SUMMARY

As a DevOps Engineer with around 2.7 years of experience as a DevOps Engineer and an overall of 5+ years in the industry, I have honed my skills in managing cloud-based technology, implementing core DevOps concepts, and automating deployment pipelines. My passion for security has led me to specialize in secure DevSecOps practices, managing infrastructure as code, and collaborating with security teams to ensure secure application development. I am a team player with experience in mentoring team members, developing and implementing new strategies, and collaborating with crossfunctional teams.
